Why Choose Us

JR Himalaya Oceania has emerged in the recent years with the aim to supply pure and healthy food products nationally and across the Globe. We process Himalayan Pink Rock Salt products from mines of very high quality pink rock salt at the foothills of mighty Himalayas in Jr district of Pakistan and bracketed with well-known formers and leading Millers, located in the heart of Himalayan Salt District – (Muridke & Nankana Sahib) District Sheikhupura, Punjab, Pakistan.

We produce all grades of himalayan salt lamps, salt candle holders, table salt, bath salts, animal lick salt, salt blocks, salt for sauna rooms, salt massaging stones and much more.

We ensure quality control procedures for salt extraction from our mines and strive to provide pure organic Pink Himalayan Salt and its products for our clients. Similarly, right from procurement to delivery of rice to end customer, we take effective quality control measures to maintain desired characteristics in the product. We believe in integrity, excellence, speed of service and commitment to our buyer.

OUR VISION

“Our aim is to make Himalayan Salt – a truly wonderful gift of nature – affordable and accessible to everyone. At the same time, we are also working to contribute to the people and community that plays a pivotal role in bringing this amazing product to our kitchens, living and work spaces – from mining, and hauling to crafting and production.”

OUR MISSION

To combine aggressive strategic marketing with quality products and services at competitive prices to provide the best value for consumers.

To combine aggressive strategic marketing with quality products and services at competitive prices to provide the best value for consumers.

History Of Himalayan Salt

Over 300 million years ago, when the ocean dried up, a massive mineral rich salt deposit was left behind, buried by the natural forces creating the mountain range. Geologists believe that the Great Salt Range was formed when tectonic plate movements formed a mountain range that trapped a shallow inland sea, which was slowly dehydrated and buried deep in the earth, forming thick, mineral-rich sea salt deposits. For millions of years the Salt Range went untouched as animal and human species developed all around it.

In 326 BC, Alexander the Great, the Greek King famous for conquering an empire ranging from Asia into Africa and Europe, was making his way across Pakistan. Stopping his army for a rest in the area now known as Khewra, Alexander's horse began licking the stones on the ground. Seeing that all the horses were doing so and taking note, a soldier himself tried one and found that the rocks were quite salty. The Khewra salt deposits had been discovered.

Himalayan salt is mined from the Khewra Salt Mine, the second largest salt mine in the world at Khewra, Jhelum District-Punjab, which is situated in the foothills of the Salt Range hill system in the Punjab province of Pakistan.

Benefits Of Himalayan Salt

There are reportedly an estimated 84 different minerals and trace elements found in pink Himalayan salt thus giving it its unique color, and slightly different taste. The natural harvesting process that allows the salt to possess many other minerals and trace elements that are not found in regular table salt.

It is believed that natural Himalayan crystal salt offers health benefits such as Negative ions generator, Purifies air, Regulating water levels in the body, Promoting stable pH balance, Encouraging healthy blood sugar levels, Reducing the appearance of aging, Promoting cellular hydroelectric energy balance, Aiding vascular health, Supporting healthy respiratory function, Promoting overall sinus health, Reducing cramps, Promoting healthy sleep patterns, Encouraging healthy libido, Promoting kidney and gallbladder health, Strengthen bones and many other benefits.
